COMPANY OVERVIEW

Corporate profile

CMCK SARL is a Congolese-owned company based in Kolwezi, Lualaba. We provide earthworks, civil construction and technical services to mining companies, private businesses and public-sector organisations.

1984 Origins in goods transport

2004 Adoption of the CMCK name

From its origins in transport, the business expanded into engineering, construction, maintenance and earthworks. CMCK stands for Constructions Métalliques et Civiles de Kolwezi.

OUR PURPOSE

Deliver work that meets our partners' requirements, with professional standards, integrity and attention to safety and the environment.

DAGRIL

CORE CAPABILITIES

Earthworks operations

Excavator loading a dump truck.

EXCAVATION & MATERIAL HANDLING

CMCK's earthworks service uses dedicated machinery and equipment. Laboratory support is available for soil and concrete testing.

Bulldozer carrying out earthworks.

SOIL & CONCRETE TESTING

Technical testing supports earthworks and civil construction.

EARTHWORKS

Roads & basin stabilisation

Access roads and earthworked embankments alongside a basin.

Earthmoving fleet pictured in the CMCK project gallery.

MUPINE • KCC

KOLWEZI / SINCE 2017

Design, construction and monitoring of the Mupine tailings storage facility for Kamoto Copper Company.

Scope includes drainage and containment systems, ongoing inspections and monitoring of the facility.

ROAD WORKS & BASIN STABILISATION

Engineering, quality control and soil testing support site operations.

TECHNICAL SERVICES

Engineering & construction

Crane lifting a structural steel member.

CIVIL ENGINEERING & ARCHITECTURE

CMCK undertakes civil construction for private clients and mining companies. Project experience includes the Kamatanda washing plant in Likasi.

ENGINEERING DESIGN & CONSULTANCY

Technical studies, topographic surveying and feasibility assessments for mining projects, complemented by design, specialist advice and quality control for infrastructure and maintenance work.

STEEL FABRICATION & ERECTION

Our steel construction department fabricates and erects structural steelwork, complementing our civil engineering activities.

Steel members and lifting equipment on site.

KAMOA MINE • KOLWEZI

Underground works

KAMOA • HDPE NETWORKS

SINCE 2021

Installation of underground piping for water and industrial fluids. CMCK prepares and assembles pipe sections, installs and secures the lines, completes connections and commissions the network.

KAMOA • RETAINING WALLS

SINCE 2020

Underground retaining structures using shotcrete, gravity walls, modular steel supports, anchors and bolts.

Photo: crew working beside scaffolding.

SUPPORTING CAPABILITIES

Maintenance & support services

Maintenance team working on a disassembled engine in the CMCK workshop.

EQUIPMENT MAINTENANCE

Preventive and corrective maintenance of industrial installations and mobile or semi-mobile equipment. Reconditioning of truck bodies and buckets, with skilled personnel available to support partners' operations.

LOGISTICS

Logistics forms part of CMCK's service offering, building on the company's origins in goods transport.

SAWMILLING & JOINERY

Custom timber work, roof structures and framing, doors, windows and furniture for CMCK, businesses and individual customers.

DAGRIL • AGRICULTURE & FOOD PRODUCTION

MUTALA & DIKAPA

DIKAPA: aerial view of cultivated land and land under development.

MUTALA FARM

KISANFU / SINCE 2010

Located 60 km from Kolwezi. The site reports approximately 800 hectares of maize cultivation.

Livestock and aquaculture facilities:
- Capacity for over 500 pigs
- Four poultry houses, each with capacity for 1,500 chicks
- Eight fish ponds

DIKAPA

KOLWEZI–DILOLO / SINCE 2024

Located 120 km from Kolwezi.
5,000 ha development target.

500 ha

reported in production:
400 ha of maize and 100 ha of beans.

More than 600 ha reported cleared.

MILLING & ANIMAL FEED

DAGRIL's processing activities include BUNGA LUALABA maize flour from a ROFF mill and ALIMENTS LUALABA animal feed from a DROSKY unit.

Project figures published by CMCK; website consulted on 10 November 2026.
